The following facts are submitted:

Method of release:  
- Discharge to stream
- Discharge to land
- Other

Which District Office was sent a copy?  
- District I
- District II
- District III
- District IV

Maximum volume to be discharged at one time:  
Bbls.

Numbers of acres in proposed discharge area (if applicable):  

Source of Water to be used for test:  
- The oil and grease content does not exceed 15 mg/l.
- There is no visible sheen or discoloration on the water.
- The Total Suspended Solids does not exceed 45 mg/l.
- The pH is not less than 6.5 or greater than 9 s.u.
- The discharge is free from foreign material.
- The discharge point is designed to prevent erosion.
- If the discharge water is to be land applied, a copy of this notice was sent and approval was obtained from the surface owner.

Executed this ______ day of ______, ______.

Signature of Affiant

STATE OF _________________ )

COUNTY OF _______________ )

Before me, the undersigned authority, on this day personally appeared __________ known to me to be the person whose name is subscribed to the above instrument, who being by me duly sworn on oath states that he is duly authorized to make the above report and that he has knowledge of the facts stated therein, and that said report is true and correct.

Subscribed and sworn to before me this ______ day of ______, ______.

My Commission Expires:  

Notary Public
INSTRUCTIONS

A. A representative of the operator shall be on the discharge site at all times during which water is being applied.

B. Surface owner approval must be obtained prior to discharge to land.

C. Weather restrictions for surface discharge to land:
   1. During precipitation events or when precipitation is imminent;
   2. When the soil moisture content is at a level such that the soil would not readily take the additional water;
   3. When the ground is frozen; or
   4. By spray irrigation when the wind velocity is such that even distribution of water be accomplished or the buffer zones below cannot be maintained.

D. No runoff or ponding of discharged water shall be allowed during application.

E. Buffer zones for surface discharge to land:
   1. 50 feet from a property line boundary;
   2. 300 feet from any actively-producing water well used for domestic or irrigation purposes; and
   3. 800 feet from any actively-producing water well used for municipal purposes.
